School of Isolated and Distance Education
MATHEMATICS METHODS Year 11
Test 2 2023 Calculator Free

Time allowed for this section **25 minutes**

Marks allocation: **22 marks**

PERMISSIBLE ITEMS

Standard Items: pens, pencils, pencil sharpener, highlighter, eraser, ruler

Special Items: **Formulae Sheet**

STANDARD FORMULAE SHEET IS PROVIDED
NO OTHER ITEMS MAY BE TAKEN INTO THE EXAMINATION ROOM

INSTRUCTIONS FOR CANDIDATES

Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated marks. **For any question or part question worth more than two marks, valid working or justification is required to receive full marks.** If you repeat any question, ensure that you cancel the answer you do not wish to have marked.

All work should be done in the space provided. Should you need extra working area you may use the blank page at the end.

Student's name:_____

SIDE Teacher's name: _____

SUPERVISOR'S DECLARATION

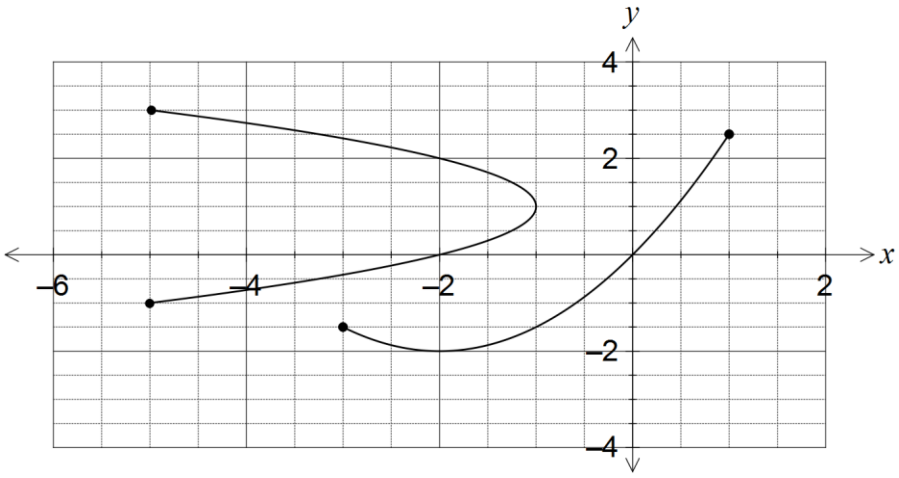
I declare that this test paper has been completed without assistance by the student named above. The time and resource restrictions have been observed and the student has not accessed notes, reference books, a computer, a mobile phone or other electronic device. I understand that this paper will not be counted for assessment if these conditions have not been met.

Supervisor's name: _____

Supervisor's signature:_____ **Date:**_____

Question 1 [2, 2 = 4 marks]

A function and another relation have been graphed on the axes below.



(a) Draw the line $x = -2$ on the graph and explain how it can be used to identify the relation that is not a function.

(b) State the domain and range of the function.

Question 2 [1, 1, 1, 2, 3 = 8 marks]

(a) A quadratic function is given by $f(x) = (x + 1)^2 - 4$. For this function determine

i. the coordinates of the y – intercept.

ii. the equation of the line of symmetry.

iii. the coordinates of the turning point.

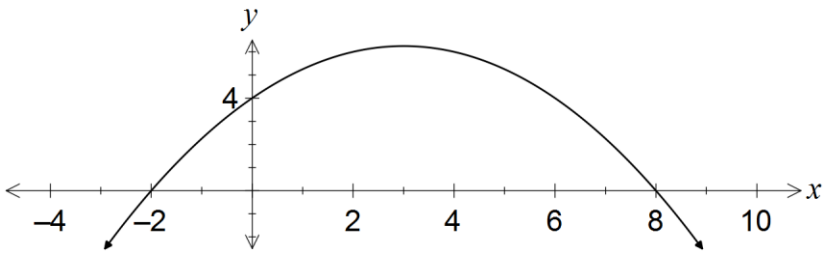
(b) Another quadratic function is given by $y = 2 + 1.75x - 0.25x^2$. Determine

I. the equation of the line of symmetry

II. the coordinates of the *x* intercepts.

Question 3 [4 marks]

(a) Part of the graph of $y = ax^2 + bx + 4$ is shown below.



Determine the values of the coefficients a and b.

Question 4 [4, 2 = 6 marks]

Consider the points A(6, -10) and B(-2, -2).

(a) Determine the equation of the line through A that is perpendicular to AB.

(b) Explain whether the line through A and B is parallel to the line with equation $3x + 3y + 5 = 0$.

I understand that this paper will not be counted for assessment if these conditions have not been met.

Supervisor's name: _____

Supervisor's signature:_____ **Date:**_____

Question 5 [2, 2, 3 = 7 marks]

(a) Demonstrate use of the quadratic formula to solve $4x^2 - 16x + 15 = 0$.

(b) Use the method of completing the square to solve the following equations.

i. $x^2 - 6x + 7 = 0$

ii. $2x^2 + 6x - 4.5 = 0$

Question 6 [5 marks]

A gardener has 40m of fencing to enclose a rectangular garden plot, where one side is an existing brick wall. Determine the dimensions of the garden to maximise the area.

Question 7 [3, 3 = 6 marks)

Write the equation of the quadratic function that;

a) intercepts the x-axis at 2 and -3 and passes through the point (1,4)

b) has a turning point of (-3,5) and passes through the point (-4,8)

Question 8 [2, 3 = 5 marks]

A stone is thrown vertically upwards from a point A. The height *x* metres of the stone above A after *t* seconds is given by $x = 20t - 5t^2$.

(a) Determine the maximum height the stone reaches and the time at which this occurs?

(c) For how long is the stone more than 15 m above A?
